

"ALL LIES!" SAYS WOMAN CONDEMNED MAN ACCUSED

Mrs. Schlagowski Weeps as She Declares in Cell that Charge Against Her of Murdering Her Husband Made by Man Convicted of the Crime Is False.

With tears welling from her eyes, her hands working nervously, and her voice breaking on every word, Mrs. Pauline Schlagowski in her cell at the Raymond Street Jail, Brooklyn, today declared to an Evening World reporter that she did not kill her husband, John Schlagowski, the Williamsburg saloon-keeper who was found with his brains battered out.

She stamped as a lie the story told in court by her condemned lover, Tony Torchokoffski, when he was being sentenced to the electric chair yesterday.

"My God!" she cried, running her fingers through her thick, jet black hair, and sobbing convulsively. "To think they say I did it! Lies—all lies! Torchokoffski lied."

"Why do you think he told the story?"

The woman rubbed one of the iron bars thoughtfully, then grasped it firmly before she answered.

"I do not know. I cannot think. Maybe to clear himself. Maybe his lawyer told him to say that. But he lied, he lied," and the unhappy woman kept mumbling "lied" in her throat.

Handsome Woman Once.

Once this woman of forty was handsome, and the sum of her remaining attractions—a good figure, flashing eyes and raven hair—still makes it plausible that the man of thirty-three who now awaits the electric chair may have been her admirer.

"But Torchokoffski never made love to me and I never made love to him," she protested.

Then in reckless desperation she added: "I never spoke to him."

Although the woman at the trial of her lover admitted having been at Holbrook street, where the murder took place, she said she never even saw Torchokoffski there. She insisted she never saw him until he went to work at the saloon two months prior to the murder.

When asked if she thought Torchokoffski killed her husband she answered: "I do not know. I did not see him do it."

Girl Athlete Catches Thief

Climbed Nimbly Down Fire-Escape to Summon Aid When She Heard Intruder Attempting to Pick the Lock.

Sixteen-year-old Gertrude Anderson, of No. 60 East One Hundred and Fourteenth street, today proved the value of her athletic training in a girls' gymnasium by climbing down hand over hand four flights of fire-escape to the rear of her apartment and getting the aid of three young men, who assisted her in capturing a burglar who had served several terms in State prison.

Miss Anderson lives with her sister Mary and their parents. To-day she was in the apartment alone. She was suddenly aroused by a strange click at the door of the apartment. She listened and heard the rattling of keys. Tiptoeing to the door, she could distinctly hear some one attempting to pry open the lock.

Down the Fire-Escape.

She ran swiftly and silently to the rear of the apartment and let herself out on the fire-escape. Then, with wonderful rapidity for a girl, she descended the iron ladders to the rear yard and ran into the street. There she met Charles McKim, of No. 14 East One Hundred and Fourteenth street; David Gordon, of No. 18 East One Hundred and Fourteenth street, and James Loughlin, of No. 116 Madison avenue, these high school boys.

Telling the boys to follow her she led them through the front entrance of the apartment-house and up the stairs. A short, broad shouldered man was still fumbling at the lock of her flat door when she reached the top of the stairs. The girl seized him by the arms.

The man shook himself free of the girl's hold, throwing her to the floor. Then he fought his way through the boys to the stairway. One of the boys seized him by the coat tails and allowed himself to be dragged down the four flights of stairs and around the hallways. The other boys kept close at his heels and when the street entrance was reached threw themselves upon the struggling couple. They fought in a tumbled mass all over the sidewalk. The man drew a knife, but before he could use it he was knocked out of his hands. The prisoner was still fighting with all his strength when Miss Anderson summoned a policeman.

Policeman Identified Him.

When arraigned before Magistrate Flammer the man said he was Samuel Craven, an agent. He declared he made no effort to break in the Anderson apartment. While he was talking Policeman Quilty, of the East One Hundred and Fourth street station, stepped from the line of policemen in the court-room.

"I know this man, Your Honor," said Quilty. "When I was a detective sergeant I knew him well. In 1921 I put him in the shoulder while he was escaping from me. He has a long record and to my knowledge has served three terms in Sing Sing prison."

Magistrate Flammer held the prisoner for further examination.

If you keep a satisfactory boarding-house you can get satisfactory boarders by advertising in the Sun and World.

WOMAN ACCUSED OF MURDERING HER HUSBAND BY MAN SENTENCED FOR CRIME, AND HER CHILDREN.

BEHAVED MYSELF LIKE A CHAPLAIN

—REV. DR. VAN DE WATER.

Rector Named in the Watts Divorce Suit Sails for Italy, Declaring He Will Answer the Charges Next Fall.

Rev. Dr. George R. Van De Water, rector of St. Andrew's Protestant Episcopal Church, who has been named in the divorce suit brought by Commodore Archibald Watt against his wife, sailed today on the Italian line steamship Lombard.

About fifty members of the congregation went to the pier to say good-bye to their rector. He was presented with baskets of fruit and bouquets of flowers by representatives of the Women's Guild, the Singing Society and the church choir. He was accompanied by his wife. He sailed on his usual annual vacation of three months and will return to the city in the fall. The clergyman appeared to be in good spirits and when asked if he would say anything on the charges brought against him by Mr. Watt, replied:

"Several newspapers have advised me to answer the charges, but I consider the advice of my counsel, Mr. Sage, better than theirs, and will make no answer until my return in the fall. 'I Have Behaved Myself.'"

"I never heard of the charges before they were made, and furthermore I do not believe my accuser ever thought of them until he was forced to invent something to cover up charges against himself. I have nothing to fear from any investigation, and it is needless to say that I have the confidence of my people. I have always behaved myself like a gentleman, a rector and a chaplain should."

Dr. Van De Water said that he and his wife would visit Rome, Palermo, Venice and Florence while in Italy, returning on the same ship to New York early in September.

The names of Dr. Van De Water and his wife did not appear on the passenger list, and he was asked if the trip had been planned only recently.

"No," he replied, "the trip was planned three months ago. I have been generally having my names on the passenger list, but this time I'm not looking for any publicity."

When Dr. Van De Water had finished talking on the charges made against him, he was asked by a member of the congregation, who had been listening, patting him on the back and making encouraging remarks, "Don't worry, Doctor. 'We're with you,' and 'Everything will come out all right,' they said."

Dr. Van De Water stood at the gangplank and shook hands with the church members as they left the ship. He was smiling, and several times laughed heartily in talking to his friends.

Waved Good-Bye to Friends.

When the steamship backed out into midstream he stood on the forward deck with his wife, waved his handkerchief to the members of his congregation, and then turned back to the pier.

Among those who went to the pier were the clergyman's assistant, the Rev. W. H. Henkle, who will have charge of a church in Texas when Dr. Van De Water returns next fall, and his adopted son, Arthur Van De Water, a member of the congregation.

Others who bade him good-bye were Vestrymen John Boardman, W. R. Roy, Mr. H. E. H. R. Olcott, Mrs. Charles King, Mr. and Mrs. Van De Water, the parents of the rector; the Misses Van De Water, his sisters; W. T. Marvin, Madison Knudsen, the organist of the church; and Mr. and Mrs. E. Thompson.

Another passenger who was on the ship was Father William Smith, Elmo Smith, Chaplain of the Fire Department.

He is going on a special visit to Rome to see the Pope, and afterward will make a short tour of Italy. While he was away Father McGovern, pastor of St. Ann's Church, Brooklyn, will take Father Smith's place in the Fire Department.

The Rev. H. A. Handell, also a Chaplain of the Fire Department, and a member of the congregation, will be on the pier to see Father Smith sail.

MRS. TAYLOR APPEALS FROM DEATH SENTENCE

Woman Condemned on the Charge of Killing Her Husband Asks for a New Trial.

ALBANY, N. Y., June 23.—Notice of appeal from the death sentence was filed today in the Court of Appeals in the case of Mrs. Kate Taylor, the Sullivan County woman who murdered her husband last winter. Mrs. Taylor is in Clinton prison, sentenced to die in the electric chair July 6.

The appeal acts as a stay of execution.

Killed by Flashlight Powder.

CHICAGO, June 23.—Annie M. Wilson, of Austin, who had a contract with a firm of photographers for the manufacture of a flashlight powder, was killed yesterday and her home wrecked by an explosion of the powder. The theory is that in lighting the powder was ignited by friction.

TINY INCUBATOR BABIES THRIVE

They Are First Infants Born Under Three Pounds Weight Ever Nourished by Artificial Means to Vigorous Growth.

An Evening World reporter today saw two interesting babies thriving in the Bellevue Hospital incubators. They have been artificially nursed for two months and for a month have been nesting in the arms of foster mothers. These are the only two infants born under three pounds weight ever nourished to vigorous growth in the incubator.

The scientific nurture of these two mites of humanity has occupied the constant attention of two doctors and two nurses through ninety days. Three months ago a well-developed young man entered Bellevue Hospital carrying a tiny bundle in his arms. He blushed like a girl as he deposited the bundle with one of the young surgeons and proclaimed the fact that the contents was the first-born of his nineteen-year-old wife. He gave his name, but begged Supt. Ricketts not to reveal it. "Whatever his father's name is, he is 'John' in the hospital."

Named John and Hans.

The other microscopic youngster is Hans Johnson, the first and only child of a young Swedish woman now living on a Long Island farm. Hans was brought to Bellevue on the evening of the same day "John" made his appearance. "John" weighed 2 pounds, 15 ounces and 2 drams. Hans tipped the scale at 3 pounds and 1 dram.

For the last two months these two star incubator boarders have been gaining by drams. During the first week "John" gained only half a dram, but Hans did not gain at all. "John," though the light-weight, seemed the brighter of the two and took his nourishment with more avidity than the more corpulent infant in the neighboring incubator.

Dr. Sherer had charge of the apportioning of food for these two important patients. That it was a delicate task may be seen from the manner in which they had to be cared for. The atmosphere in the incubators had to be regulated to a temperature between 90 and 95 degrees Fahrenheit. A degree or two out of the way might have been fatal in the early days, so that almost momentary attention had to be given to the thermometer.

Regulating the Temperature.

Hans only needed a temperature of 90 degrees. "John," probably because of the few drams less blood in his veins, needed a warmth of 95 degrees. Both infants were fed every hour. For the first seven days they were fed on mother's milk, brought from a neighboring maternity hospital.

This delicate treatment in the nursing of "John" and Hans was continued for two weeks, when it was seen that both infants were increasing in vitality. Then when they were taken out again to be weighed at an apothecary's scales it was seen that "John" had gained two drams on Hans, weighing two pounds, fifteen ounces and five drams, whereas Hans weighed three pounds and two drams.

At the present time Hans weighs three pounds, fourteen ounces and eight drams and "John" weighs three pounds, fourteen ounces and one dram, showing that in three months he has gained ten times as much as the tiny Swede. That is, in the course of twelve weeks "John" has gained 251 drams and Hans only 241.

Likely to Grow to Manhood.

The record of the weights and measurements shows that the nourishment of these two mites has certainly been of the scientific order. Both are now steadily increasing in weight under the care of their foster mothers and there is little fear that they will not grow up into strapping infants and in the course of years be able-bodied citizens.

Yesterday the three-pound first-born, a girl, of Henry Park street, was taken to Bellevue and deposited in the incubator. She is getting along bravely.

MISHAPS TO CHILDREN.

One Burns Himself with Matches, Another Falls from Window.

Three-year-old William Stone played with matches today in his nightgown at his home, No. 419 Third avenue, and set himself on fire. He was severely burned.

Frederick Young, a four-year-old, was taken from his home, No. 431 East Fourteenth street, to Bellevue Hospital suffering from a compound fracture of the right arm, after falling out of a window at his home.

WAR ARTIST TO LONDON "BLACK AND WHITE."

Found Pe-ru-na of Benefit in the Climatic and Nervous Strain of War and Travel.

MR. H. B. MANLEY, War Artist to London

"Black and White," 688 Craig Street, Montreal, Canada.

When a man travels in extreme hot or cold climates he realizes how valuable a friend he has if he carries a bottle of Peruna. I know of no article in my traveling outfit which I have learned to prize higher.

If you are suffering with the extreme heat of summer, or if you are afflicted with a cold, a gripe or bronchitis, Peruna restores you, or if you are suffering with sleeplessness or if your appetite is poor, again Peruna acts as a good remedy. I have tried it for months and am only too glad to acknowledge it as a true loyal friend in times of trouble. I do not hesitate to recommend it to all.—H. B. Manley.

Travellers Should Use Peruna.

People going on a journey, either by rail or sea, should take with them a bottle of Peruna. It is an excellent remedy for all ailments brought on by travel, such as colds, gripes, or acquiring contagious diseases.
